US House of Representatives

Powell Gammill

AZ-2

Libertarian

Phoenix

Bio: Currently Senior Editor of [FreedomPhoenix.com](http://freedomPhoenix.com), writer. A graduate of Northern Arizona University, who has been a laboratory manager, molecular biologist, clinical virologist, and microbiologist (semi-retired). I founded and ran the State's bioterrorism detection section at the public health laboratory for its first few years, which taught me more about how government is incapable of protecting the public than anything else.

Resided in Arizona for 50 years.

Ran for this office in 2004, and was a Presidential Elector. I host my own campaign web site: <http://GammillForCongress.com>.

Question 1: What is the best action the Congress can take on the war in Iraq, and on terrorism?

Pull ALL our military out of every nation on the planet, and bring them home.

Permanently cease **all** foreign aid. Mind our own business. Stop interfering in American business' abroad or at home.

"It is our true policy to steer clear of entangling alliances with any portion of the foreign world." — President George Washington.

"America does not go abroad in search of monsters to destroy." — President John Quincy Adams.

My how my nation has changed. We have gone from a nation of commerce to a nation of terror, conquest and thievery. Spending our children's blood and inheritance along the way.

Question 2: What legislation would you propose concerning the right to privacy, including abortion, dying and alternative life style?

Congress lacks the authority to legislate a Right.

Freedom good! Government bad, bad, bad, bad, bad.

I will not initiate force, or fraud against any individual. I will resist those who do with all means at my disposal.

I will approach all individuals with the idea of interacting with them through mutually agreed upon conditions. I will treat others as I would like to be treated.

What other political or personal philosophy do you need? And wouldn't the world be a more peaceful place if everyone learned to mind their own business?

Freedom's the answer. What's the question?

Question 3: What legislation would you propose to control US borders and illegal immigration?

When people talk of restricting the Right of people to travel to offer their labor and products to others they are artificially creating barriers to those goods and services. This restricts the supply and drives prices of those goods and services higher, which makes the limited number of dollars the government has left in your wallet able to purchase less.

Open the borders. Make your dollar go farther. Eliminates the costs of government (border patrol).

US citizenship, not immigration, is constitutionally a federal matter, all else is reserved to the states, which historically are responsible for immigration.

Question 4: What other issues for the country do you view as critical and what solution(s) do you propose?

With a \$46.4 trillion dollar national debt, and half-a-trillion dollar deficit budgets passed every year, it is time to begin to shut down the federal government, before our impending economic collapse shuts it down for us:

1. Permanently discharge virtually ALL federal employees.

2. Auction off ALL federal lands, buildings and assets to pay off some of our national debt. Regrettably this would only bring in \$5 trillion.
3. Eliminate all entitlement programs and account guarantees.
4. Eliminate ALL taxation of individuals, property, manufacture and services. Any budget deficits should be made **the personal liability** of the national elected officials.

I agree to inclusion in your 2006 League Voters Guide.
