Clean Elections Candidate? N/A, Federal

Participating in any debates or candidate forums? I would love to. Do you really think there will be any debates or forums in this wonderful “democracy” of ours?

Top 3 issues:

1. Our elected officials spending and national debt is unsustainable, even with our robust economy. Our economy WILL devastatingly collapse, and soon. Fire sale: Terminate virtually ALL federal employees. Auction off ALL federal lands, buildings and assets to pay off our national debt. Eliminate all entitlement programs and account guarantees.
2. Bring our military and their equipment home, and send them home to their families and jobs. They're for defense. Cease ALL foreign aid. Kick the UN out of the USA, and sell their buildings. Sadly with all the above, we will still owe foreign bond holders enormous amounts of debt.
3. Eliminate ALL taxation of individuals, property, manufacture and services. Government can be allowed to collect a flat tariff rate on all property at the point of import into the country as its sole revenue source. Any treasury deficits would be made the personal liability of the national elected officials.
